Abstract (en)

[origin: WO2009000437A1] The invention relates to a plaster connecting strip (28) for the reveal (13) of windows (12) and doors, comprising a plaster part (29) having a base (33) and a first plaster rim (34), which projects from the front side of the base, and comprising a carrier part (31), having a free end (36) away from the reveal and a fixed end (37) close to the reveal. The carrier part carries on the free end thereof the plaster part and on the front side thereof comprises a contact region (41) for contacting insulation (23) of the reveal. The width of the contact region substantially corresponds to the thickness of the insulation. The carrier part on the fixed end thereof comprises a first connecting region (45) for fastening to the frame (20) of the window or of the door and/or to the reveal and/or to a fastening part (48).
