Abstract (en)
[origin: WO2009015720A1] A pivot lever which, in the pivoted-in position, is lockable in a trough (48) is described, said pivot lever comprising a locking device (52) which is accommodated in the pivot lever (16) and can be unlocked via an access opening (54) in the pivot lever (16), wherein the access opening (54) can be rendered inaccessible by means of a cover, and wherein the cover can be blocked mechanically, in particular electromechanically, in its covering position.
