Abstract (en)
[origin: WO2008151944A1] The present invention relates to an illuminating device (1) with a housing (5) for accommodating at least one illuminating device (2). The illuminating device (1) is mounted pivotably in the housing (5). At least one pivot bearing (7) is provided for the illuminating device. Power is supplied to the illuminating device by or over the pivot bearing. The illuminating device consists of a first housing part (8) and a second housing part (9) which can be connected mechanically with one another, particularly by plug and socket connections.
