Abstract (en)
[origin: EP2172251A2] The binding a toe sided sole holder unit (6) and a heel sided sole holder unit (8), where an inter space is formed between the holder units for retaining a ski boot. A locking device (16) is provided for interlocking a locking component (4) in an interlocking position. A coupling half is provided at an upperside for coupling engagement with a head of a ski pole (12). An actuating unit (11) actuates the ski pole and displaces a displacement element. The actuating unit is pivotably adjustable around a rotational axis running orthogonal to a surface of a ski (1).
