Abstract (en)

[origin: EP2172594A2] The connection (10) has a connection element (15) provided in a connection region (14) between traffic barrier wall sections (12, 13). The connection element comprises a cladding shoe (17) arranged over an end-side wall element (11a) of one traffic barrier wall section and adapted to a contour of a concrete wall element (11). The connection element comprises a connection block (16) supporting the cladding shoe and connected to another traffic barrier wall section, where the cladding shoe consists of steel sheet structure. The connection block is made of concrete.
