Abstract (en)
Disclosed is a refrigerator having a home bar (20).The refrigerator has a reinforcement unit (60) that supports a pair of rotating shafts (41) to securely assemble the rotating shafts with a home bar door (40) such that the rotating shafts securely support the home bar door. The refrigerator includes a home bar door (40), a pair of support members (61) provided in the home bar door symmetrically to each other, and a connection member (62) connecting the support members to each other. The support members are integrally formed with the connection member.
