Abstract (en)  
[origin: WO2009015803A1] The present invention relates to a hair care device (1), having a handle (3), a function head (4) which can be connected to the handle (3) and which has a hair treatment device (5), particularly a brush and/or a tooth field, and having an ion-discharging device (9) for discharging ions onto the hair, the ion-discharging device (9) having at least one ion outlet (11). According to the invention, the hair care device (1) is characterized in that the function head (4) and/or a housing part which surrounds the ion outlet (11) has at least one grounding area for dissipating/limiting electronic charges. Advantageously, the ions are discharged exclusively from the back of the device (8) which faces away from the hair treatment device (5), while the grounding area on the function head (4) can be provided on the front of the device.
