Abstract (en)

[origin: WO2009018948A2] The present invention relates to a sterilization method suitable for sterilizing groups of objects, particularly a method, in which objects are disposed in groups, wherein one group of objects is equipped with a casing partially enclosing the group, but not completely closed, the objects are placed into a sterilization chamber, sterilized there, and removed from the sterilization chamber, and wherein the group of objects is placed in a packaging means suitable for completely enveloping the group of objects. The invention further relates to a system for carrying out the method.
