Abstract (en)

[origin: US2009018382A1] Methods and apparatus for containing a hazardous material according to various aspects of the present invention operate in conjunction with a container having two compartments. The first compartment is configured to contain the hazardous material, and the second compartment contains a hazard control material. The container may further comprise a wall separating the first compartment from the second compartment. The wall is configured to open upon occurrence of a trigger event.
