Abstract (en)  
[origin: US2010224509A1] A transportable arrangement that includes a plurality of stuffing envelopes adjoining each other in planar manner and a packaging therefor. A cover body made of cardboard-like material surrounds the plurality of stuffing envelopes. The cover body surrounds the plurality of stuffing envelopes on the bottoms thereof, the tops thereof and both end sides completely or partially. The narrow sides are left open. The cover body comprises two rectangular panes, designed relatively stronger than the other components of the cover body and resting on the end sides. The cover body comprises a tear tab that is arranged on one of the end sides of the plurality of stuffing envelopes. This allows the cover body to be torn open and the cover body to be pulled off the plurality of stuffing envelopes
