Abstract (en)

[origin: WO2009018879A1] The invention relates to a guide for devices for processing sheet material, particularly bank notes and checks, that is equipped with a guide body (1) having multiple guide wings (2) on the guide body (1), said guide wings (2) having at least three edges (15, 16, 17) running parallel to one another tapering to a point, said guide further comprising a guide drive (3, 4, 5) connected to the guide body (1) that places the guide body (1) in motion in at least two different directions, at least one of the two motions being a linear translational motion.
