Abstract (en)

[origin: WO2009003885A2] The invention relates to a method and a device for indexing a coded video data stream. According to the invention, the video data stream comprises information relative to the location of regions of interest of each picture, said method comprises steps of: reception (T1) of coded video stream, recording the coded video stream on a recording support, decoding (T2) location information of regions of interest, selection (T3) of a region of interest per picture, decoding (T3) of video data, selecting (T4) a predetermined number of regions of interest for the video data stream from among the regions of interest selected per picture, recording (T6) of the selected regions of interest.
