Abstract (en)

[origin: EP2174870A1] A preform distributor (3) is provided above an open container (2) for improving the drop loading of the container (2) with preforms (P) in bulk,. Said distributor comprises a central opening (32), at least two lateral openings (33a ; 33b), and deflecting means (31) for deflecting preforms that are dropped above said deflecting means (31) into the lateral openings (33a ; 33b). The central opening (32) and each lateral opening (33a, 33b) are designed for enabling preforms to pass through the distributor.
