Abstract (en)
[origin: EP2175063A1] A washing machine of the type in which at least a set of three solenoid valves (1, 2, 3) controlled according to a washing program feeds with outlet pipes (4, 5, 6) a plurality of delivery channels (141, 142, 15, 16, 17, 18) for the delivery of water into a washing chamber or onto a plurality of compartments containing washing agents, characterized in that at least one outlet pipe (4) of a first solenoid valve (1) is divided into two outlet pipes (41, 42) with outflow nozzles (8, 9) oriented so as to cause the outlet flows to interfere respectively with the outlet flows of a second (2) and third (3) of said solenoid valves, when actuated conjointly with said first solenoid valve.
