Abstract (en)

The system has an insulating plate made of heat-insulating material. A reflection layer is provided for reflecting heat radiations. The reflection layer is arranged at side of the insulating plate and is fastened to a delimitation surface of the insulating plate. The reflection layer has a reflection foil laminated on the insulating plate. The reflection foil is laminated with projection on the insulating plate. The projection is provided with bonding agents, which serves for connecting with the adjacent projection and insulating element and other components of a roof structure.

Abstract (de)

Die Erfindung betrifft ein Dach-Dämmsystem mit einem aus wärmedämmendem Material bestehenden Dämmelement und mindestens einer auf mindestens einer Seite des Dämmelements angeordneten und Wärmestrahlung reflektierenden Reflexionsschicht, wobei die Reflexionsschicht an einer Begrenzungsfläche des Dämmelements befestigt ist.
