Abstract (en)

[origin: GB2450757A] An entertainment device comprises skeletal modelling means to control placements of a three dimensional mesh representing some or all of a user avatar in response to the position of one or more skeletal components of the user avatar, skeleton modification means to modify one or more physical properties of one or more skeletal components of the user avatar via a user interface, and rendering means to render the user avatar responsive to the modified user avatar skeleton. Also disclosed is administering a multi-player online virtual environment, comprising reception means to receive data descriptive of respective modified avatar skeletons from a plurality of remote entertainment devices, and transmission means to transmit data descriptive of respective modified avatar skeletons to a plurality of remote entertainment devices.
