Abstract (en)

[origin: WO2009019287A1] The invention relates to a device and a method for drawing a web (10) made of a carrier material in a printer or copier. A motor (20) transfers the rotation thereof to a drive roller (12) by means of a clutch (22). The clutch (22) is electrically controllable, so that a desired drawing force is applied to the web (10). The device can be used for a plurality of operating states of the printer or copier.
