Abstract (en)
[origin: WO2009004295A1] A laundry product has an enclosing wall and contains a composition in the form of a powder. The composition comprises an insoluble active agent which is capable of binding soil or free dyes. The wall is permeable to water and to components dissolved therein. After the product has been contacted with water in a laundry washing machine, the insoluble active agent remains within the enclosing wall, and a portion of the contents of the bag are discharged on contact of the bag with water, characterised in that the product has a re-sealable portion.
