Abstract (en)
[origin: WO2009018919A1] The invention relates to an actuating device having at least one electrical and/or electromagnetic actuation unit (10). The invention proposes that at least two activation sequences performed by different actuation elements (12, 14) of the actuation unit (10) be associated with at least two different electrical and/or electromagnetic states of the actuation unit (10).
