Abstract (en)
[origin: WO2009021581A1] In the case of a light (1) having means for holding and for electrical connection of at least one tubular lamp (3), having a light grid (5) which is arranged in front of the lamp (3), seen in the emission direction, and has a plurality of aperture openings (12) which are provided for light emission, as well as profile elements (25) which are arranged on both sides of the light grid (5) and form housing walls, the light grid (5) is provided with a reflective coating through which a portion of the light emitted by the lamp (3) can pass. The profile elements (25) are composed of a transparent material.
