Abstract (en)

[origin: WO2009007872A1] A method for non-destructive surveying in depth of stratified bodies (11) comprises the stages of irradiating the body (11) with at least one form of radiation (3) capable of reaching at least one deep layer (1,10) of said body, detecting the radiation (4a) emitted by or reflected from the body (11), and processing said radiation emitted by or reflected from the investigated body.
