Abstract (en)
[origin: WO2009046467A1] A bicycle comprises a conical, disk-shaped cover (17), particularly in the region of the front wheel (12), on either side of the wheel (12), wherein the axis of the hub (13) of the front wheel (12) extends through a central opening (21) of the circularly and conically configured disks (17). The disks (17) are clamped between the nuts (22) of the hub (13) and the free ends of the front fork (11) such that they do not rotate when using the bicycle, even if the front wheel (12) is rotating, and (advertising) imprints applied thereon are easily visible even when the bicycle is in use.
