Abstract (en)
[origin: EP2177416A1] The vehicle e.g. tramway (4), has a body (8) comprising a trimming structure (18). A pivot connection (LP1) forms a guiding unit that guides a coupler for assuring mobility of the coupler with respect to the body. A mobile skirt (12) extends around the coupler, and partially closes a loop defined around the coupler. Another pivot connection (LP2) forms a guiding unit that guides the skirt for assuring mobility of the skirt with respect to the body. The connections are different, and the coupler is moved with respect to the skirt.
