Abstract (en)
[origin: EP2177442A1] The invention relates to a housing adapted for placing on a pallet, provided with a frame comprising angle profiles and side panels for fastening to the frame. Such a housing is often applied as a box mould for application in the cheese industry. These box moulds are known in practice for curing young cheese packed in foil. In the housing according to the invention the frame also comprises transverse profiles and the side panels are arranged releasably and form-fittingly on the inner side of the frame.
