Abstract (en)
[origin: EP2177677A2] The device has a base plate (1) including an opening (2) for flow of sewage water, and ring-shaped parts (8, 9) pre-assembled in a base region. An adjustment unit adjusts the base plate with respect to the ring-shaped parts during assembling the base plate. An inlet unit (22) is arranged above or in the opening of the base plate in an assembled condition. Another adjustment unit adjusts the inlet unit with respect to the base plate during assembling the base plate. The former adjustment unit includes a flange (16) that extends horizontally in the assembled condition.
