Abstract (en)
The rail (1) has extensions (2), which are extended along the guide rail, and track rollers (4) rolling on the extensions by elements (5) of a swimming-pool enclosure. The elements are displaced along the guide rail, and groove-shaped recesses (6) lie between the elements. Through holes (7) lie one below the other in a longitudinal direction of the rail, and are arranged in the recesses by the rail. The through holes comprise an elongated form, and are arranged along an entire length of the guide rail. A rod is provided between the through holes and other through holes.

Abstract (de)
Eine Laufschiene für Schwimmbadüberdachungen weist sich entlang der Laufschiene (1) erstreckende Erhebungen (2), auf welchen Laufrollen (4) von entlang der Laufschiene (1) verschiebbaren Elementen (5) der Schwimmbadüberdachung abrollen, sowie zwischen den Erhebungen (2) liegende, rillenförmige Vertiefungen (6) auf. In den Vertiefungen (6) sind in Längsrichtung der Laufschiene (1) hintereinander liegende Durchbrechungen (7) durch die Laufschiene (1) angeordnet. Dadurch kann die Laufschiene (1) gleichzeitig als Gitterrost für Überlaufbecken verwendet werden.
