Abstract (en)

[origin: EP2177702A1] The tubular hollow section (1) has a profile wall (2) that is formed as double wall. An outer wall (6) is made up of metal, particularly high-grade steel or aluminum and an inner wall (7) is made from plastic, where the walls are firmly connected with each other. Independent claims are included for the following: (1) a device for producing a tubular hollow section, particularly a hollow section; and (2) a method for producing a tubular hollow section, particularly a hollow section.
