Abstract (en)

The stand (10) has a retaining device (12) for vertically retaining and holding drill elements. An attachment device (40) fixes the retaining device in ground. A carrier (42) is provided at an upper end of the attachment device, where the retaining device is removably retained at the attachment device by the carrier. The retaining device has a horizontal base (14) including a centring element (30), where an outer diameter of the centring element is smaller than an internal diameter of the drill elements. An independent claim is also included for a method for producing a cased drill.

Abstract (de)

Die Erfindung betrifft einen Bohrrrohrständer mit einer Aufnahmeeinrichtung zum vertikalen Aufnehmen und Haltern von mindestens einem Bohrrroherelement und einer Befestigungseinrichtung zum Verankern der Aufnahmeeinrichtung im Boden.
