Abstract (en)

[origin: EP2177961A1] The tweezers have a branch (1a) whose one end (2) is joined to an end of another branch (1b). A free end (3) of each branch has a removable gripping element (4) that is freely rotated around a swivel axis (A1) at the free end of the branch. The gripping element comprises a longitudinal axis (A3) perpendicular to the corresponding swivel axis. Each branch has a removable pad (5) that is fixed to a free end (6) of the gripping element, perpendicularly to the longitudinal axis of the gripping element, where the pad is in the form of parallelepiped bar. The pad is made of plastic material.
