Abstract (en)  
[origin: EP2178098A1] The switch (11) has two switch elements (13a,13b) that are operated by a pushing motion (23a,23b) and by a perpendicularly oriented sliding or tractive-motion (25). An electronic sensor responds to the pushing motion or the sliding or tractive-motion. A switch rocker (15) is supported in a rotating manner. The switch rocker is operated by the switch elements.
