Abstract (en)
[origin: EP2178101A1] There is described a low voltage circuit breaker (1) for opening and closing electrical contacts, provided with a thermal safety system (3) of the bimetal type with a release lever (5) capable of operating opening means (2) suitable to force opening of the electrical contacts and a bimetal (4) with a constrained portion (4a) and a free portion (4b) capable of intercepting the insertion lever (5); calibration means (6) are provided to calibrate the position of the bimetal (4) which comprise a pusher (7) thrusting the bimetal (4) so as to set the position of the bimetal (4); the pusher (7) is movable both by axial intrusion and by peripheral action.
