Abstract (en)

[origin: DE102007039841B3] Clamp comprises a housing (34) with a first housing part (40) with an inner chamber (46) having an opening facing a first bearing surface and a second housing part for closing the opening. An independent claim is also included for a method for producing the clamp. Preferred Features: The second housing part is formed as a lid and is fixed to the first housing part. The housing parts are made from a plastic material. The first housing part has an L-shaped structure with a longitudinal region (42) extending along a sliding rail (12).
