Abstract (en)

[origin: WO2008150162A1] A rack for supporting round objects with a total weight of 1 to 75 tons per rack, wherein the rack has at least two load bearing lines or at least one load bearing surface for supporting at least one round object, wherein the at least two load bearing lines or the at least one load bearing surface are/is connected to at least one supporting foot for transferring the load from the at least one round object to a supporting surface, wherein the at least one supporting foot extends at the side edges of the rack so that the load is at least largely transferred at the side edges and the rack is designed so as to be nestable for surrounding at least one other approximately identically shaped rack at least partly, preferably at least largely.
