Abstract (en)

[origin: WO2009010943A2] An electric motor (25) according to the invention for a motor vehicle has a stator (1) with predetermined areas (4) for connection to a vehicle frame, wherein the stator (1) can be connected to the vehicle frame by welding or by screwing, for example. The electric motor (25) according to the invention also has a rotor (13), wherein the rotor (13) can be arranged on a drive shaft (17) which is rotatably mounted in the stator (1). The electric motor (25) is embodied as an external rotor motor and has a planetary gear mechanism (26).
