Abstract (en)

[origin: FR2919022A1] The generator (200) has a compressed air and engine oil pressure accumulator (251) connected to an inlet of a multi-stage pressure multiplier (241), where the accumulator comprises an oil reservoir with an air pressure sensor. The multiplier has mixed medium pressure applied to a pressure cylinder of a variable compression ratio engine. The mixed medium pressure is controlled by a stage selection solenoid valve (285) and connected to an actuating cylinder of the engine.
