Abstract (en)

[origin: EP2180129A1] The method involves placing two roof elements (3,4) opposite to each other on a U shaped frame. The frame defines a frame case against its U-base (5b) corresponding to its U-shape nature. A central element-plate holder is arranged in the U-base. The central element-position holder is exchanged in contrary to a desired central element-position unit (8) after finishing the recess (10).
