Abstract (en)  
[origin: WO2009013730A2] Disclosed is an orthotic apparatus for treating calcaneal varus, the apparatus comprises an orthotic shell having a plantar surface configured to support a portion of a foot disposed in the orthotic, the orthotic shell including a wall configured to surround a medial boundary of the foot; and a heel portion of the foot. The apparatus further comprises a cutout in the orthotic extending laterally through a portion of a midfoot portion of the support surface, thereby leaving a posterior cuboid supporting surface extending laterally from the wall configured to surround the medial boundary. The apparatus additionally comprises a strap having one end attached to a midfoot portion of the wall surrounding the medial boundary and configured to pass substantially dorsally over the foot, plantigrade through at least a portion of the cutout in the orthotic shell, and laterally over a plantar aspect of the plantar surface.
