Abstract (en)
[origin: WO2009030516A2] A method for changing the color of keratinic fibers, particularly human hair, that substantially avoids damage to the hair and is able to at least partially "repair" damage that has already occurred, which is to say strengthen the hair structure, comprises these steps that directly follow each other without further intermediate steps: (i) Applying a bleaching agent composition to the keratin fibers and allowing it to act over a period from one to 45 minutes, (ii) Rinsing the bleaching agent composition, (iii) Applying a coloring agent composition, comprising at least one natural colorant, (iv) Rinsing the coloring agent composition.
