Abstract (en)
 [origin: WO2009010257A1] A vehicle seat with a backrest and a seat part is proposed, wherein the backrest or the seat part has at least one structural element which has a cavity (5), wherein the cavity is formed by a baseplate (2) and at least two profiles (3.1, 3.2, 3.3, 3.4) connected to the baseplate with a cohesive material joint, wherein a filling (6) which is introduced in order to influence the stability and/or the deformation behaviour of the backrest and/or of the seat part is provided in a corner region of two profiles, wherein the filling has a foam support and a foam material, and wherein the foam material at least partially surrounds the foam support.
