Abstract (en)

[origin: WO2009024457A1] The present invention relates to a method for producing cross-linked acrylic acid polymers, characterized in that the method is a precipitation polymerization carried out in a solvent comprising a hydrocarbon and/or alkyl ester, at at least two different temperatures, and using at least two different initiators. The invention further relates to cross-linked polymers obtainable using the method according to the invention, and cosmetic and pharmaceutical preparations comprising such polymers.
