Abstract (en)
[origin: WO2009010292A2] The invention relates to a sound absorber (10) having an absorption material (27) for absorption of spatial sound, wherein the invention provides for the absorption material (27) to be formed from glass-filament yarns or rovings, which are produced from glass filaments, or from glass-filament fabric which is produced from glass-filament yarns. Web edge waste which is created during the production and/or the processing of the glass-filament fabric can preferably form the absorption material.
