Abstract (en)

[origin: WO2009010403A2] The invention relates to a household appliance input unit, especially for a hob (10a, 10b), comprising at least one operating element unit (12a, 12b) designed as a power unit (14a, 14b) for the operating elements. The aim of the invention is to provide a household appliance input unit with improved operating characteristics in terms of a suitable operating time and/or high flexibility. To this end, the operating element power unit (14a, 14b) has a plurality of operating regions (16a, 16b) with which at least two main stages (18a, 18b) and at least one intermediate stage (20a, 20b) can be associated.
