Abstract (en)  
[origin: WO2009024564A2] The present invention relates to a transceiver circuit (200) which supports a bidirectional mode. The present invention relates particularly to a bidirectional transceiver circuit (200) which is signal-compatible with JEDEC SSTL 2. The present invention also relates to a differential transceiver circuit (500) which supports a bidirectional mode and is signal-compatible with JEDEC SSTL 2. Finally, the present invention relates to transceiver circuits (700, 800) which, in interaction with the bidirectional transceiver circuits (200, 500), allow a bus system to be set up.
