Abstract (en)

[origin: EP2181857A2] The machine has a collation chain (20) with chain roof segment (23) with an extraction element (24). The portion of a chain roof (25) of the collation chain is formed based on the adjustment of position of the extraction element. A rotating shaft of the extraction element is located in the plane of the chain roof in the direction perpendicular to the conveyance direction (a).
