Abstract (en)
[origin: EP2181859A2] The pad (1) has a flat base (2) that is limited by side sections (4, 9), an upper side and a lower side for storing the pad on a table. A coupling point attaches the pad at a data transfer device (3) i.e. Universal serial bushub. The coupling point has two T-shaped connecting elements (5) i.e. Universal serial bustype A plugs, that comprise a free contact surface and project from one of the side sections of the base. The free contact surface partially points to the base. The coupling point is integrally formed with the base.
