Abstract (en)  
[origin: EP2181907A1] The system has a measuring value recording device connected with drive cables of points for recording electrical measured variables. A measuring module (21) is attached to the drive cable of each point and comprises a measuring value recording unit, evaluation unit, display and interface (20) for connecting peripheral devices such as data collecting computer, remote control device and software update device. The measuring module has a current measuring device (4) with a hall sensor (5), and a voltage measuring device (7) with a converter (9).
