Abstract (en)
The winding device (1) has a winding bed and a pressing roller device (10), which is arranged above a winding roller (5) and comprises a mass damper arrangement with mass dampers (13, 16). A pressing roller (11) is arranged in a carrier (12). The mass dampers are arranged in middle of the carrier. The damper arrangement acts on the carrier. The mass dampers are formed as active mass dampers, which are connected with a sensor e.g. acceleration sensor and force sensor, arrangement. The sensor arrangement determines acceleration in the roller device.

Abstract (de)
Es wird eine Rollenwickleinrichtung (1) angegeben mit einem Wickelbett (4) und einer Andruckwalzeneinrichtung (10). Man möchte eine hohe Produktivität erreichen können. Hierzu ist vorgesehen, dass die Andruckwalzeneinrichtung (10) eine Tilgeranordnung mit mindestens einem Tilger (13, 16) aufweist.
