Abstract (en)
[origin: EP2182149A1] The device (1) has a pull-in flange (8) for engagement behind a closing element (2) of an espagnolette fitting, where the closing element is movable along the pull-in flange in a closing position. The pull-in flange is arranged on a pivot lever (7). The closing element is connected to the pivot lever via a coupling device (12), such that the pull-in flange is pivoted against the closing element during a movement of the closing element along the pull-in flange. The pivot lever and a guide for a slider (9) are arranged on a base plate (5).
