Abstract (en)

[origin: EP2182157A1] The cover (14) has an elongated cover body (17) with a visible side (15) facing the gap, and a rear side (16). A longitudinally running channel (24) is provided on the rear side of the cover body and a fastening body (20) is movably hold in the channel. The fastening body has a fastening lug protruding from the channel for fixing at a jamb (11). The channel is integrally formed with the cover body.
