Abstract (en)

[origin: EP2182160A2] This invention refers to a device with protection net and assembly procedure, suitable as a barrier for every kind of building opening. It uses profiles (1) especially designed and made up of plastic material (polyamide) with fiberglass, thus allowing mass production and easy handling. It also counts on assembly and tie means (7) integrally related to a safety mesh-like net (9) to be used as a retaining barrier in balconies, terraces, windows, and stairways preferably. It will reduce the risk of children and/or careless people falls in a safe, economical and esthetical manner.
